#### **DETAILED ACTION**

## **Drawings**

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the cooling apparatus in claim 13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14, 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the liquid inlets" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 12 recites the limitation "its gas-filled cavities" in line 2. There is insufficient antecedent basis for this limitation in the claim.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then

narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 13 recites the broad recitation a cooling apparatus, and the claim also recites a Peltier cooling apparatus which is the narrower statement of the range/limitation.

Claim 13 contains the trademark/trade name Peltier. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a cooling apparatus and, accordingly, the identification/description is indefinite.

Regarding claims 16 and 21, line 5, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim s 18-23 provide for the use of an automatic sample collector, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 18-23 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 4-7 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginsburg in view of McDowell et al.

In regard to claims 1, 4-7 and 15, the Ginsburg reference discloses a "sample collector" (see Figures) comprising a "collection container" 19, a "supply line" (3, 5, 7)

and an "integrated apparatus" 33, but doesn't disclose the gas permeable liquid barrier. However, the McDowell et al. reference discloses another sample collector having a gas permeable liquid barrier (13, 31) to filter the supply material. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Ginsburg device to have a gas permeable liquid barrier in view of the teachings of the McDowell et al. reference in order to filter the supply material before being collected.

Claims 2, 3, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginsburg as applied to claim 1 above, and further in view of Sharpe.

In regard to claims 2, 3, 16 and 17, the Ginsburg reference discloses the invention substantially as claimed (discussed supra), but doesn't disclose a "gaspermeable liquid barrier" connected to a gas discharge. The Sharpe reference discloses another sample collector having a "gaspermeable liquid barrier" 5 that stops liquid and allows gas to filter through. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a "gaspermeable liquid barrier" within the gas discharge 33 of the Ginsburg device in view of the teachings of the Sharpe reference in order to further stop liquid and allow gas to filter therethrough.

Claims 8, 9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginsburg as applied to claim 1 above, and further in view of Roberts.

The Ginsburg reference discloses the invention substantially as claimed (discussed supra), but doesn't disclose having a pump and valve. However, the Roberts reference discloses another sample collector having a pump 54 and valve 22 to control the flow of fluid within the system. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a pump and valve on the Ginsburg device in view of the teachings of the Roberts reference in order to further control the flow of liquid through the system. Further, in regard claim 11, it would have been obvious to automatically control the pump or valve, since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

## Allowable Subject Matter

Claims 10 and 12-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art pertains to various sample collectors, similar in structure to that of the Applicant's device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy L. Maust whose telephone number is (571) 272-4891. The examiner can normally be reached on Mon. - Thur. 6:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Huson can be reached on (571) 272-4883. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
